Text on reverse:

Condition - Abuts fair to good. Plank fair to good (certain  
planks are bad). Trusses are fair. Floor system fair.

Allowable Load - Two 3 ton truck loads

Recommendations: Build new steel truss bridge 24' wide reinforced  
concrete floor on old abutments widened or for  
better appearance a concrete tied arch could be  
built there. Either structure should be made  
good for two 15 ton loads. Cost - Steel truss  
bridge \$22,000 - Concrete tied arch \$27,000.

HILL STREET BRIDGE, GREENWICH  
Black truss built by THE OWEGO BRIDGE CO., OWEGO, N.Y.  
It is a liability and should be unconditionally  
condemned. The cost of repairs as noted in detail  
would be too great as it would have to be posted for  
five tone or slightly less.
